

## EDUCATE, ENCOURAGE, AND ENJOY

We promote a natural high. The Endorphin high. The focus of our school programs is on the three "E"'s. Educate. Encourage. Enjoy. We want to partner with you to bring a fresh approach to drug awareness.

### **Educate**

We want to discuss drugs. Marijuana. Stimulants. Cocaine. We want to discuss experimentation , peer pressure and how and why addiction takes place. We educate youth on endorphins – the natural high you can't buy, smoke, or snort. We don't use scare tactics. We use facts.

We go in-depth to discuss stimulants, dopamine, neurotransmitter's opiates, and THC. We dispute the lie that pot is an innocent drug and explain how long term use can retard cells and lead to that 'spaced out' effect.

# Putting Drugs in Perspective Promoting The Endorphin High

### **Encourage**

We want to encourage youth to achieve a natural high. We want to encourage physical fitness, goal setting, and self confidence. We want to reach the kid who is using drugs and show them a way out. We want to show those who don't use drugs that they never have to start. We do this through clothing, conversation and community.

### **Enjoy**

We promote living life to the fullest. True fulfillment instead of a temporary substitute. I use my yo-yo skills as a fun and entertaining way to visually demonstrate sluggishness, lethargy, efficiency, effectiveness and freedom -- the effects of a life with drugs and a drug free life.
